

DIRECTIONS FOR USE:

SWITCH

Mixing: Half fill tank with water. Add the required amount of Switch. Add wetting agent as recommended by manufacturer. Fill the remainder of tank with water, maintain agitation.

Storage: Store in a cool, dry area. Protect from heat and cold extremes.

CROP	SOIL APPLICATION	NOTES (SOIL)	FOLIAR APPLICATIONS	GROWTH STAGE	NOTES (FOLIAR)
Tobacco	10L per ha diluted 2.5L per 100L water	At base of plant 2 weeks after planting or with first Nitrogen application	2-10L per ha diluted 1-2.5L per 100L water (250ml in a 10L watering can)	At 2 and 4 weeks after planting	Avoid hot, windy weather
Tobacco & Other Seedlings	2ml per square meter at planting and at replanting	Drench with a 2.5% dilution (250ml in a 10L watering can)	2-10L per ha diluted 1-2.5L per 100L water (250ml in a 10L watering can)	At germination and 2 and 4 weeks after planting	Avoid hot, windy weather
Soya & Other Legumes	10l per ha	Via irrigation or spray rig or dribble on the row	2-10L per ha diluted 1-2.5L per 100L water (250ml in a 10L watering can)	At the 3 leaf stage	Avoid hot, windy weather
Maize & Wheat	10-25L per ha	Via irrigation or spray rig or dribble on the row	2-10L per ha diluted 1-2.5L per 100L water (250ml in a 10L watering can)	At the 3 - 5 leaves stage	Avoid hot, windy weather
Potatoes	10l to 20l per ha (use 20l under high pH conditions)	Via irrigation or spray rig or dribble on the row	2-10L per ha diluted 1-2.5L per 100L water (250ml in a 10L watering can)	At germination and 2 and 4 weeks later	Avoid hot, windy weather
Macadamias & Avos	10l per ha twice in the season with Nitrogen application or with the flush	Via irrigation or spray rig or dribble on the row	2-10L per ha diluted 1-2.5L per 100L water (250ml in a 10L watering can)	During the flush	Avoid hot, windy weather
Citrus	10L per ha split twice before flowering and after fruit set	Via irrigation or spray rig or dribble on the row	2-10L per ha diluted 1-2.5L per 100L water (250ml in a 10L watering can)	Before flowering	Avoid hot, windy weather
Deciduous Fruits & Nuts	10l per ha twice in the season with Nitrogen application or with the flush	Via irrigation or spray rig or dribble on the row	2-10L per ha diluted 1-2.5L per 100L water (250ml in a 10L watering can)	During the flush	Avoid hot, windy weather
Tomatoes & Vegetables	10l to 20l per ha (use 20l under high pH conditions)	Via irrigation or spray rig or dribble on the row	2-10L per ha diluted 1-2.5L per 100L water (250ml in a 10L watering can)	At 2 and 4 weeks after planting	Avoid hot, windy weather

Use when recommended. Apply recommended rates, do not exceed use.

Compatibility: Follow all labels carefully. This product may be compatible with other agrochemicals. Seek advice before mixing.
